Approval for Certification as NJSFACTs Data Collection System Compliant Application

Mr. Bill Prinziwalli
Corporate Technologies, LLC
PO Box 333
Ramsey, NJ 07446

Dear Mr. Prinziwalli,

Congratulations! You have successfully submitted test data which has been deemed fully compatible with the NJSFACTs EMS Data Collection System of the New Jersey State First Aid Council. This letter shall verify that you have completed initial certification, and you may represent your product as being compatible in exchanging data with NJSFACTs.

As a condition of certification, you must maintain compatibility by updating your product whenever new versions releases and system changes are announced by the NJSFACTs Project Committee. Information and tools necessary to update your product will be provided as they become available from our developer. After updating your product you must resubmit a data test file and be re-certified.

Attached is the NJSFACTs certification logo; you may display it as part of your marketing campaign for your product so as to announce its compatibility with our system.

Thank you for participating in the NJSFACTs certification program, and for supporting volunteer EMS!

Daniel Januseski
NJSFAC Data Collection Project Chairman
