

EMERGENCY SERVICES SOFTWARE

ESS/Ambulance

Information Management System

A comprehensive computer database system that manages your administrative activities

SYSTEM COMPONENTS

- **Call Tracking**
- **Human Resources**
- **CME Tracking**
- **Equipment Inventory**
- **LOSAP Monitoring**
- **Vehicle Maintenance**
- **Personnel Scheduling**
- **Donor Tracking**

Benefits

- Improved accuracy & efficiency
- Reduced administrative workload
- Funding justification
- Elimination of scheduling errors
- Monitors staff certifications/qualifications
- Centralized member information

Developed by Experts

- Developed by an experienced emergency services member
- Proven system — in use since 1997
- Modular design, easily expanded

Data Entry

- Quick data entry
- Intuitive screen inputs
- Drop down menus
- Pre-loaded information tables
- Recalls historical information

Reports

- Delivered with pre-written reports
- Custom reports created easily
- Reports on activity, scheduling and member information
- Allows various selection criteria

User Quotes

“Analyzing data is a very important part of managing our service. Without good data, managers and planners cannot make good decisions. As our call volume grows year after year, utilizing a computerized data collection and reporting system is not an option, but rather a necessity. I highly recommend this system.”

— *Timothy P. Egan, NREMT-P, Chief of Operations,
Director of Information Technology, Rockland Paramedic Services*

“ESS/Ambulance is so much more than just data collection software — it is a comprehensive system that handles many important record keeping functions for our squad. We're very pleased with the product, and the level of customer service has far exceeded our expectations.”

— *Walter Graulich, Lieutenant,
Cedar Grove Ambulance & Rescue*

“ If your agency is considering a product that will enhance its operation, ESS/Ambulance will meet your needs. We went from performing our administrative functions by hand — which took numerous hours to perform — to a comprehensive system that prints out statistical reports with the click of button. I would be happy to provide a reference to any agency officer that is considering purchasing this product.”

— Scott Mikos, Captain Eastchester Volunteer Ambulance Corps
